

I am concerned about a current proposal to allow LPFM radio stations to take precedence over current FM translator service stations. My favorite station is K-Love which I listen to on FM 94.9. It keeps me going each day and is a real inspiration to me. This has helped me particularly as I suffer with depression. The encouraging words and songs are a great help to me personally. I know that there are so many other residents of this area as well as the country whose lives have been greatly improved by the K-Love station. I would strongly urge you to keep the current regulations so that K-Love and other stations like it can continue to help people in our community.
